Amendment to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

- Claim 1 (currently amended) A film preparation An apparatus for proparing films suitable for encapsulation from a solid film forming material comprising:
 - a) at least one casting drum;
 - means for melting <u>solid</u> said film-forming material on demand;
 - c) pump means; and
 - d) an extrusion device;
 - wherein said apparatus prepares encapsulation films from a solid film-forming material.
- Claim 2 (original) An apparatus according to claim 1 wherein said film-forming material has an aqueous component.
- Claim 3 (original) An apparatus according to claim 2 wherein said film-forming material comprises at least one component selected from the group consisting of starch, gelatin, carrageenans, gums and synthetic materials.
- Claim 4 (original) An apparatus according to claim 3 wherein said film-forming material comprises iota-carrageenan and modified starch; water, a plasticizer, and a buffer.
- Claim 5 (original) An apparatus according to claim 3 wherein said film-forming material comprises gelatin, water and plasticizers.
- Claim 6 (currently amended) An apparatus according to claim 1 wherein said means for melting solid said film-forming material comprises a melt grid.
- Claim 7 (original) An apparatus according to claim 6 wherein said melt grid is above the solid film-forming material.

- An apparatus according to claim 6 wherein said melt grid is below Claim 8 (original) said solid film-forming material.
- An apparatus according to claim 1 wherein said pump means is a Claim 9 (original) positive displacement pump.
- An apparatus according to claim 9 wherein said positive Claim 10 (original) displacement pump is selected from the group consisting of gear pumps, lobe pumps, sine pumps, worm pumps, and archimedes screws.
- Claim 11 (currently amended) An apparatus according to claim 1 additionally comprising a reservoir means disposed between said means to melt said film-forming material polymer and said extrusion device.
- Claim 12 (original) An apparatus according to claim 1 wherein said extrusion device comprises a chamber and an extrusion slot.
- Claim 13 (original) An apparatus according to claim 12 wherein said extrusion device is a coat hanger die.
- Claim 14 (currently amended) An apparatus according to claim 11 4 additionally comprising a manifold disposed between said reservoir means and said extrusion device.
- Claim 15 (currently amended) An apparatus for applying a polymer to a substrate comprising:
 - means to melt a solid said polymer on demand; a)
 - pump means to transport the molten polymer to an extrusion device; b)
 - reservoir means disposed between to dispose between said means to c) melt said solid polymer and said extrusion device; and
 - at least one casting drum. d)
- The apparatus according to claim 1 wherein said extrusion device Claim 16 (original) comprises a chamber and an extrusion slot.

- Claim 17 (original) The apparatus according to claim 16 wherein said extrusion device is a coat and hanger die.
- Claim 18 (currently amended) The apparatus according to claim 15 additionally comprising a distribution manifold disposed between said reservoir means and said extrusion device.

Claim 19 (canceled).

Claim 20 (canceled).

Claim 21 (canceled).
